CM Process Solutions 24 pair lockable boot rack is manufactured from 304 Grade stainless steel with a glass bead blast finish. Individually welded prongs give extra strength and durability. Each prong comes with the facility to lock the boot in place by means of a padlock. The prongs have welded end plates and location guides which are numbered. The racks are mounted on four 5" castors, all castors are swivel design with the front two castors having the facility to be locked in place by a foot brake. The racks are finished with a smooth glass bead blast finish making them a fully wash down sanitary design.
