**READY MEALS**

CM Process Solutions 24 pair wall mounted boot rack is manufactured from 304 Grade stainless steel with a glass bead blast finish. All of our boot racks are designed with hygiene in mind, each of the boot holders has a stainless steel welded cap instead of a plastic push in cap which are potential dirt traps and can come loose over time. The boot rack is designed with spacers for minimum contact to the wall allowing ease of cleaning. The racks are crevice-free in design ensuring a quick and sanitary clean down.
