CM Process Solutions automatic hand wash system is a fully programmable standalone unit which can be used everywhere where hand washing is obligatory. The machine can be supplied standalone or in a combination with other hygiene stations.

**FEATURES**

**304**

STAINLESS  
 STEEL

HAND WASH

HYGIENIC

BY DESIGN

SENSOR  
 OPERATED

ADJUSTABLE  
 TIMES

CHEMICAL  
 STORAGE

## OPERATIONAL DESIGN

On stepping up to the machine the operator places both hands into the chambers to start the wash cycle. The HW is completely automatic and controlled by sensors. Once activated the machine will first dispense soap and then after a short delay water at a premixed temperature. A signal light indicates when the process is complete.

Cycle times and parameters such as soap dispense time, water spraying time etc are fully adjustable.

Optionally the unit can be fitted with a paper towel dispenser and a trash basket or even an automatic dryer such as a dyson airblade. Chemical is stored within the framework of the machine.

## SANITARY DESIGN

As with all our equipment the range of hygiene stations are built using hygienic principles. The construction of the machine is manufactured from 304 grade stainless steel, surfaces are radiused, so excess liquid drains easily from the frame.

## YOUR CHOICE

Unlike some of our competitors CM Process Solutions warranty does not obligate you to buy chemicals from us in order to receive spare parts or support.

We understand that each application is unique, and we fully believe that there is no one who understands your needs better than you, the customer and your current chemical supplier.
