CM Process Solutions single station knee operated sinks are manufactured from 304 grade stainless steel. The fully welded design ensures that our sinks meet extensive high sanitation and hygiene standards.

A perfect solution for areas with limited space, the sink is wall mounted with rounded corners and a 6 inch depth basin. The high splash back allows ancillary items such as soap dispensers to be mounted on the rear.

SINGLE STATION KNEE OPERATED WALL MOUNTED SINK

OPERATIONAL DESIGN

The one station sink is supplied with a knee actuation valve. All our sinks are supplied as standard with a mixer valve (95 °F to 149 °F) regulating hot and cold water.

A stainless steel faucet is centrally fitted to the splash back and the sink is ready to install upon delivery.

Alternatively, our sinks can be supplied with a sensor operated design. [click here for more information](#)

SANITARY DESIGN

As with all our equipment, sink stations are built using hygienic principles. Our sinks are hand free in design ensuring any potential virus and bacteria transmission is minimized.

FEATURES

304 grade stainless steel construction

Fully welded design

Sensor or knee activated

High rear splash back

Supplied with stainless steel faucet and mixer valve

Wall mounted design
