CM Process Solutions heavy duty triple utensil wash sinks are manufactured from continuously welded 304 grade stainless steel with a sanitary glass bead blast finish. The triple bowl design enables the user to pre-wash, wash and rinse. These utensil sinks are easy to clean and more robust than the standard industry knock together assembly units. Spacious in design for cleaning large utensils, trays and machine change parts. The sinks have a high splash and mount on heavy duty tubular legs with adjustable feet. The legs are inset allowing the utensil wash sink to be placed tight up against the wall. The sink can be supplied with standard faucets or our water saving spray hoses.
